

### HANTEL ART

Hantel Art is owned by German-born Dietmar Hantel, one of a few blacksmiths in the world to have perfected the art of wrought iron, and the first of his kind in the GCC. Each Hantel Art creation is a one-of-a-kind, original, custom-made design. Original Hantel Art smith work is handcrafted using traditional

tools and techniques that date back to the 16th century. With every piece, the steel is galvanized with special techniques to ensure that it does not rust for at least 100 years.

### SHADOWS & LIGHT

Inspired by black and white photography, Chella Textiles is celebrating its 10th anniversary by casting its own classic products in the stark beauty of black and white. "Our Shadows & Light Collection sheds a high-contrast new light on our solution-dyed

acrylic jacquards, velvets, chenilles, matelasses and sheers," said Lee Menichella, president and founder, Chella.

### DISCUS

Discus is the first spotlight designed with the specific requirements of LED technology in mind. The innovative design concept, developed by EOOS for Zumtobel, ensures purely passive cooling of the LED module, in addition to very compact dimensions and a distinctive appearance. Discus' unmistakable shape reflects our familiar perception of the

sun: a disc with radially arranged rays, in this case the blades of a passive cooling attachment, ensuring a long service life of the central high-performance LED module. At only 28mm, the LED design is extremely flat.
