POLI Keramik

Look under a microscope at the seeds of the *Ornithogalum dubium* flower, and you'll find a shape similar to that of the Milky Star, designed by Pudelskern. Crafted from white ceramic, the surfacing units can be used individually as wall hooks or combined as an interlocking, organic design across a larger area. Each piece allows for a multitude of organic arrangements to create a unique and naturally inspired puzzle.

Chella Textiles

What's black and white and sure to make an impression? Sketchbook Floral from Chella. The whimsical pattern is simple and to the point, as if drawn by hand on a piece of paper.

The fabric, which comes in five colorways (*shown in Ink*) with 100 percent solution dyed acrylic, is ideal for use as upholstery or drapery.

Leland International

Tune into the ebb and flow of Mother Nature with the Ebb. The seat draws on images of logs floating along a river. Made from white oak veneer, the hollow seat ranges from 4 ft. to 10 ft. in length and features a white laminate interior. An optional mirror caps each end, and upholstered onlays are also available. Ebb is 100 percent recyclable. www.lelandinternational.com
