

How do you care for Chella fabrics? Easily! Brush them off regularly to keep dirt and dust from accumulating; sponge with a solution of mild soap and cool water. You may machine wash in cool water and air dry or machine dry on a low setting. You can even use bleach! For more specific care instructions, visit our website: www.chellatextiles.com

Can this really be used outdoors? Absolutely! Don't be fooled by Chella's sophisticated design and luxurious hand. Chella fabrics are woven from 100% solution dyed acrylic yarns and are lightfast, resist stains, mold and mildew and are machine washable – Guaranteed!!

Where is the fabric made? Chella's designers work with mills in Europe and the US to develop our diverse fabrics. These same mills produce high-end luxury decorative fabrics in silk, cotton, wool and other natural fibers; they have met Chella's challenge to weave the same sophisticated constructions in solution dyed acrylic yarns.

What types of uses are these fabrics made for? Chella is perfect indoors and out in any area where you need a fabric that will withstand harsh treatment by sun, rain, freezing temperatures, children, and pets. Chella is perfect for those indoor areas of the home that extend beyond the walls.

Can Chella be used for "commercial" projects as well as for residential? Chella has been widely used for pools, spas, restaurants, and high traffic areas in four and five star hotels and resorts worldwide. Its luxurious look and feel belies its work horse performance characteristics, making it perfect in commercial applications.

What type of finishing can the fabric be treated with? The team at Chella are experienced in finishing Chella fabrics to serve a variety of functions, including FR for vertical installations and a canvas-like finish for awnings, cabanas and umbrellas. Call us to discuss your specific requirements at 805.560.8400

Does it really resist mildew? Yes, since Chella is woven from 100% solution dyed acrylic yarns, it is resistant to mold, mildew and stains. Keep in mind that dirt and food particles that may adhere to its surface can mildew this is why we recommend brushing and cleaning regularly.

Can I use this fabric on the reverse side? Many designers have created a new look by using Chella fabrics on the reverse side. If you have specific performance requirements, for a commercial project in particular, contact us to be sure that the specific fabric you are working with will meet your needs.
