Questions to ask before
buying a home warranty

Founded by Angie Hicks, above, Angie's List gives the scoop on all types of local service companies.

A home warranty insures coverage for service, repair, or replacement of a home's major systems and appliances; an annual contract runs from \$250 to \$400. Find out the following before you commit:

- Is the warranty company licensed? Is it a member of the National Home Service Contract Association (NHSCA)?
- What does the contract cover? For example, will it replace hardwood floors that were ruined by a leaky dishwasher?
- Can you choose which contractor the company will send to address a claim?
- Does the warranty cover things that you first tried to fix yourself?
